This accredited IOSH Managing Environmental Responsibilities four day training course has been designed for those who need to manage environmental issues in compliance with their organisation's policies, legislation and best practice, or for whom environmental management is an integral part of a wide range of responsibilities. The 4 days are combined with practical case studies, group exercises, trainer presentations and work-based exercises.

Course Benefits

On Successful completion of the course delegates should be able to:

- Identify hazards to the environment from an organisations perspective
- Apply management principles & practice relating to environmental issues
- Identify organisational responsibilities with regard to environmental legislation
- Introduce environmental reviews taking into account current best practice
- Communicate environmental practices effectively to all levels of staff in an organisation, including senior management
- Overview of component parts of an environmental management system i.e. ISO 14001

Modules covered:

- | | |
